Plymouth Products California Proposition 65 Warning

The Safe Drinking water and Toxic Enforcement Act of 1986 also known as Proposition 65 is a California law that applies to all products sold in California. Proposition 65 requires California to publish a list of chemicals known to cause reproductive toxicity or cancer. This list currently includes over 950 chemicals.

Proposition 65 does not ban or restrict the sale of the chemicals on the list. The purpose is for Californians to be well informed in making decisions about the products they use.

Businesses are required to provide warnings to Californians when products cause exposures to any of the chemicals on the list. Plymouth Products has reviewed the list to identify possible chemical exposure. Based on its knowledge of the existence of a listed chemical, Plymouth Products has provided a warning without pursuing to evaluate the level of exposure.

Plymouth Products has chosen to place the Proposition 65 warning notification on all of its phenolic based products out of caution for its consumers. Products have not been tested for levels of exposure, and therefore, may or may not have Proposition 65 exposure levels of the listed chemicals.

All phenolic based products that Plymouth Products provides as finished goods in retail packaging will have this warning on the packaging prior to August 30, 2018. See warning label below.

WARNING: Cancer - www.P65Warnings.ca.gov.

For all phenolic based products that Plymouth Products provides in bulk packaging, it is the distributor's and/or retailer's responsibility to add these warnings to the product. Distributors or retailers who sell these products through an e-commerce website or catalog to customers in California will be required to provide these same warnings to a purchaser prior to completing a purchase beginning on August 30, 2018.
